

SERVICE OVERVIEW

Passkey Readiness Assessment

Know exactly where your Entra ID authentication stands before you change anything.

WHY NOW

On 1 February 2027 Microsoft stops delivering Entra ID verification codes by SMS and voice call. Most tenants show what is enabled. Very few show who depends on what, and who will be stuck on that day.

WHAT YOU GET

- ✓ Enabled, registered and actually used methods, reported separately
- ✓ A named list of users who still depend on SMS or voice codes
- ✓ Users grouped by how they work, from single-device staff to admins
- ✓ Admin and other sensitive accounts flagged before anything changes
- ✓ A short management summary with the decisions to make
- ✓ A baseline to measure the migration against

A GOOD FIT WHEN

You need facts before changing policy, or management wants to know how big the passkey move really is.

How the assessment runs

1

Scope

We agree on scope, contacts and read-only access.

2

Review

Your tenant is reviewed read-only, plus one working session about devices and ways of working.

3

Walkthrough

Results are presented to your team with clear next steps.

YOU RECEIVE

- ✓ Assessment report
- ✓ Management summary
- ✓ User groups and the path for each
- ✓ Open decisions and pilot scope
- ✓ Results walkthrough

NEEDED FROM YOUR SIDE

- ✓ Read-only access for the assessment period
- ✓ One contact person
- ✓ Time for one working session

NOT INCLUDED

Configuration changes. The assessment only reads.

AFTER THE ASSESSMENT

Stop with a clear picture, or continue with Passkey Migration & Rollout. Every migration starts with this assessment.
